

Vault Items

There are four different types of items that can be created in Bitwarden. These are Login, Card, Identity and Secure Note. They are somewhat self explanatory but I will cover them: Login is for a login (website); Card is for a credit card or debit card; Identity is for an identity, this may be good to use for kids or identities such as business entities; and Secure note is very plain in the sense that it has a name and a box for a note. Below are the four different types of items that can be added, note the different available text boxes for each type of element.

Adding a new Element (4 different kinds):

What type of item is this?

A dropdown menu with a blue header containing a checkmark and the text "Login". Below the header are three white options: "Card", "Identity", and "Secure Note". The menu is set against a light gray background.

Adding a new Login:

ADD ITEM ✕

What type of item is this?

Login ▼

Name

Folder ▼

Username 

Password    

Authenticator Key (TOTP)  10  878  724 

URI 1  

Match Detection ▼

Text ▼

OWNERSHIP

Who owns this item?

[Save](#) [Cancel](#) ☆

Editing an Item: the one thing to note when editing the item is to ensure you save it after you are done making changes. It is easy to get burned by clicking the X on the top right and then having to reset a password again.

EDIT ITEM ✕

Name	<input type="text" value="Bookstack"/>	Folder	<input style="border-bottom: 1px solid #ccc;" type="text" value="No Folder"/>
Username	<input type="text" value="admin"/> 	Password	<input type="password" value="....."/>    
Authenticator Key (TOTP)	<input type="text"/>	 878 724
