# Overview

Commandcenter is the central application for OurCompose. It manages billing, instances, and support.

With Commandcenter we provide the basic ability to sign up for instances, choose the services you want to deploy and then deploy those instances for your organization.

It does this all seamlessly with behind-the-scenes scripts and requests to our internal services, providing customers only a basic view of what they need to customize their instance.

Commandcenter currently offers three tiers of pricing: minimal, personal, and personal plus. Right now our minimal is still being developed, but we have our personal, and personal plus plans ready to be deployed. Deploying the personal plan offers up to four services on your instance, making it a great jumping off point for anyone who wants to start to manage their digital life online with the cloud. From the personal plan we then offer the Personal Plus plan which gets more into hosting anything you need and offering our wide range of services.

# Signing Up

The link to sign up for OurCompose is [here](#).

When you get to this page, there will be 3 fields: email, password and password\_confirmation.

**OurCompose** [Log in](#) [Didn't receive confirmation instructions?](#) [More](#) ▾

## Sign up

Email	<input type="text"/>
Password	<input type="password"/>
Password Confirmation	<input type="password"/>

Sign up

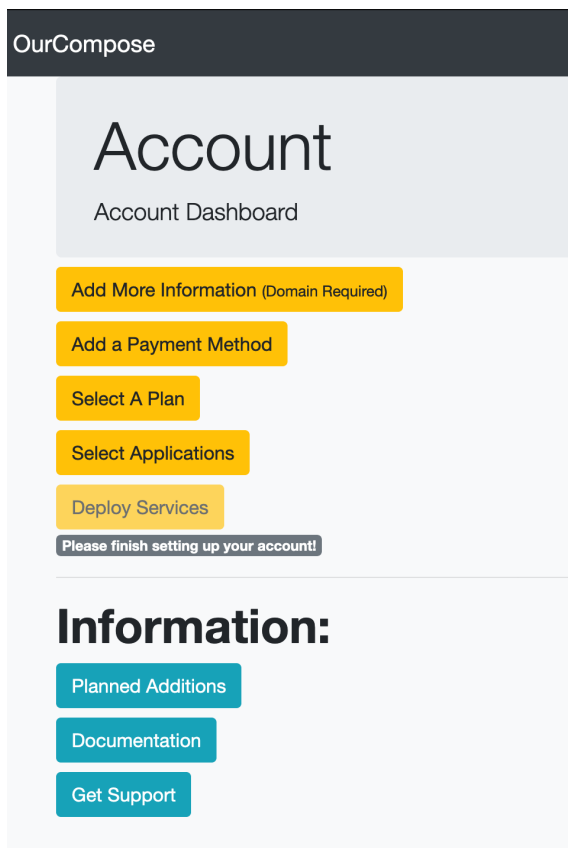

Please verify your email after signing up!

After entering this information **it is important to note you will not be able to sign in until your email is confirmed** via the weblink.

# Deploying an Instance

At the current version of CommandCenter, we only support one deploy per email. In the future we will support multiple instances (domains) per email address.

After signing up and confirming an email address, signing into CommandCenter will give you more options and fields to fill out specifics of your instance you would like deployed.

From top to bottom in this picture we have **Add More Information (Domain Required)**, **Add a Payment Method**, **Select a Plan**, **Select Applications**, and finally **Deploy Services**.

## Add More Information

After clicking the **Add More Information** tab, some fields will appear and allow you to add more information for your account. This information is important for us for two reasons: 1) we will be able to deploy your instance to a specific subdomain, 2) with the other information will allow us to contact you for support requests in an easier manner.

Add More Information (Domain Required)

First Name

Last Name

Address

Address 2

City

Zip

Domain (Required)

.ourcompose.com

We need your domain to properly point the services to the correct place.

Add Information

Above is the empty form.

Add More Information (Domain Required)

First Name

Last Name

Address 2

City

Zip

Domain (Required)

jackm|

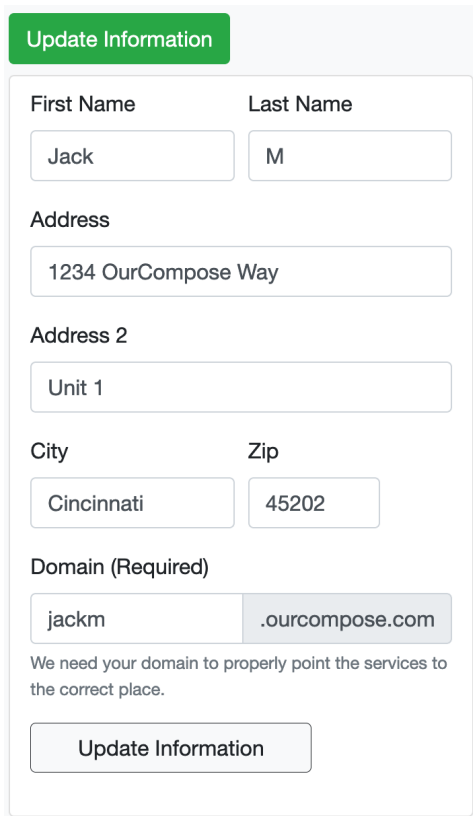

.ourcompose.com

We need your domain to properly point the services to the correct place.

Update Information

Above is the minimal amount of information needed. (domain only)

The form is titled "Update Information" in a green header. It contains several input fields: "First Name" (Jack), "Last Name" (M), "Address" (1234 OurCompose Way), "Address 2" (Unit 1), "City" (Cincinnati), "Zip" (45202), and "Domain (Required)" (jackm, .ourcompose.com). A "We need your domain to properly point the services to the correct place." note is present below the domain fields. An "Update Information" button is at the bottom.

Update Information

First Name Last Name

Jack M

Address

1234 OurCompose Way

Address 2

Unit 1

City Zip

Cincinnati 45202

Domain (Required)

jackm .ourcompose.com

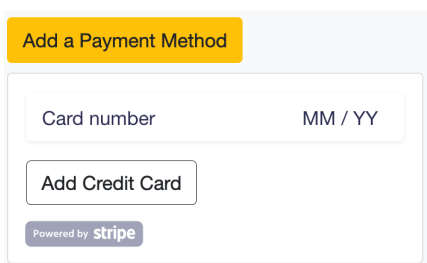

We need your domain to properly point the services to the correct place.

Update Information

Clicking the **Add Information** or **Update Information** button at the bottom of the form will give a green success if everything is filled out correctly (picture above).

## Adding or Updating a Payment Method

Adding a payment method is required to select a plan, and it is also required to deploy services. We use Stripe for our payment processing.

The form is titled "Add a Payment Method" in a yellow header. It contains input fields for "Card number" and "MM / YY". Below these is an "Add Credit Card" button and a "Powered by stripe" logo.

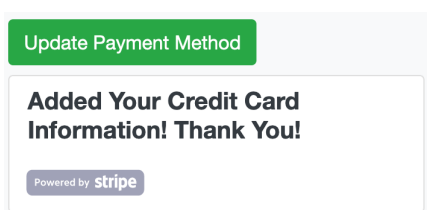

Add a Payment Method

Card number MM / YY

Add Credit Card

Powered by stripe

Above is a picture of the Payment Method Form.

The form is titled "Update Payment Method" in a green header. It contains a message: "Added Your Credit Card Information! Thank You!". Below this is a "Powered by stripe" logo.

Update Payment Method

Added Your Credit Card Information! Thank You!

Powered by stripe

After hitting **Add Credit Card**, the link tab at the top will highlight green and now say "Update Payment Method." Upon adding a card, you will now be able to update this card information.

# Select a Plan

After adding a domain and adding a payment method, you will now be able to select a plan.

Currently OurCompose offers 3 plans: minimal, personal, and personal plus.

Select A Plan

**Minimal Plan**  
\$4.99/Month  
A basic toolkit made of the application of your choice!

Select

[More Information](#)

**Personal Plan**  
\$9.99/Month  
A full set of applications built for 1

Select

[More Information](#)

**Personal Plus Plan**  
\$19.99/Month  
Take the personal plan and add some more juice in the likes of RAM, CPU, and Space

Select

[More Information](#)

Above is the "Select a Plan" menu with the three choices.

Update Plan

**Minimal Plan**  
\$4.99/Month  
A basic toolkit made of the application of your choice!

Unsubscribe from this Plan

**Personal Plan**  
\$9.99/Month  
A full set of applications built for 1

Select

[More Information](#)

**Personal Plus Plan**  
\$19.99/Month  
Take the personal plan and add some more juice in the likes of RAM, CPU, and Space

Select

[More Information](#)

After selecting a plan, "Select A Plan" will turn into a green "Update Plan" and the "Select" button will turn into "Unsubscribe From this Plan"

Please note billing does not start until the deploy is triggered via Deploy Services.

## Select Applications

OurCompose currently offers 9\* services (\*this number may change). Before deploying your instance, you will have the ability to add applications.

## Select Applications

### Select Services

Please note applications will be limited based on your instance size.

- ☒ bitwarden
- ☐ bookstack
- ☐ firefly
- ☐ jekyll
- ☐ kanboard
- ☒ manager
- ☐ nextcloud
- ☐ Rundeck
- ☐ wordpress

Select Services

Above is the Select Services form. Use the Radio buttons to select services and then click the select services button to confirm these services.

View Applications

## Selected Services

**Please note applications will be limited based on your instance size.**

- ☒ bitwarden
- ☐ bookstack
- ☐ firefly
- ☐ jekyll
- ☐ kanboard
- ☒ manager
- ☐ nextcloud
- ☐ rundeck
- ☐ wordpress

Update Services

After hitting "Select Services," the button will update to "Update Services" and "Select Applications" will change into "View Applications." During this time, any time before you deploy, you will be able to update these services. However, once the deploy starts, these services are locked.

## Deploy Services

Deploying services will deploy your services to your subdomain and start your billing cycle.

Deploy Services

Ready to Deploy!

The photo above showing "Deploy Services" in blue means your instance is ready to deploy!

Clicking Deploy will then lock up the deploy button and then it will deploy your instance. This can take from 15 minutes to a few hours.

Once your instance is online, you will receive an email from your instance (from the portal application) with a initial password and an email asking you to then confirm your email address with portal.
