Getting Started

Welcome Screen

Firefly III has very simple welcome screen to get you started with the most basic of setups:

The screenshot shows the 'Welcome to Firefly III!' screen. On the left, there's a dark sidebar with the Firefly III logo and the text 'Welcome to Firefly III!'. The main content area is titled 'Getting started' and contains a 'Welcome to Firefly III!' section. This section explains that the user has successfully installed the tool and asks them to enter their bank's name and the balance of their main checking account. It also mentions that multiple accounts can be added later. Below this, there are input fields for 'Bank name' and 'Balance'. The 'Balance' field has a currency dropdown menu currently set to '€'. A note states that if the user's normal currency is not listed, they can create their own currencies under 'Options > Currencies'. Another note mentions that Firefly III will automatically create a savings account, but the user can specify a balance for it. There is a 'Savings balance' input field currently set to '0'. Below this, there is a note about using Firefly III in another language, with a 'Language' dropdown menu currently set to 'English (US) (English (US))'. At the bottom, a message says 'That's it! You can continue by pressing **Submit**. You will be taken to the index of Firefly III.' and there is a green 'Submit' button.

Introduction Guidance

The first time you visit ANY page, the introduction guidance will pop up and walk you through the details on that page.

You can always re-enable it by hitting the "Question Mark" button in the header, and selecting "re-enable introduction guidance".
