Financial Control

Budgets

This page shows you an overview of your budgets. The top bar shows the amount that is available to be budgeted. This can be customized for any period by clicking the amount on the right. The amount you've actually spent is shown in the bar below. Below that are the expenses per budget and what you've budgeted for them.

Bills

This page contains a listing of the bills that you have created, along with all of the details, including links to the relevant rules, and the recurrence period, among other things.

Clicking on individual bills will show a table with some general information about the bill. It also shows a chart of the transactions linked to the bill. There is also a button to re-scan old transactions so they will be matched to the bill.

Piggy Banks

The Piggy Banks on this page are shown in list form, and are shown as they are grouped (if enabled) into their relevant groups. Note that the total of all the groups is not displayed if there are multiple groups. The ungrouped piggy banks are showed in their own separate "ungrouped" group.

The bottom of this page also displays the status of your Accounts which any of the Piggy Banks are saving on. This is a field that's set when creating a new Piggy Bank.

Clicking on the name of the Piggy Bank will give you a graph of the events, and a summary of the history and current status of the Piggy Bank.
