# Users

For information on groups and users - check out the [upstream project documentation](#)

Getting Started

Up and running you are going to be logging in with Admin/Admin with a vanilla instance of Kanboard. At **OurCompose** you will use your username and password you used to sign up to CommandCenter with.

5. The default login and password is **admin/admin**

Adding a User
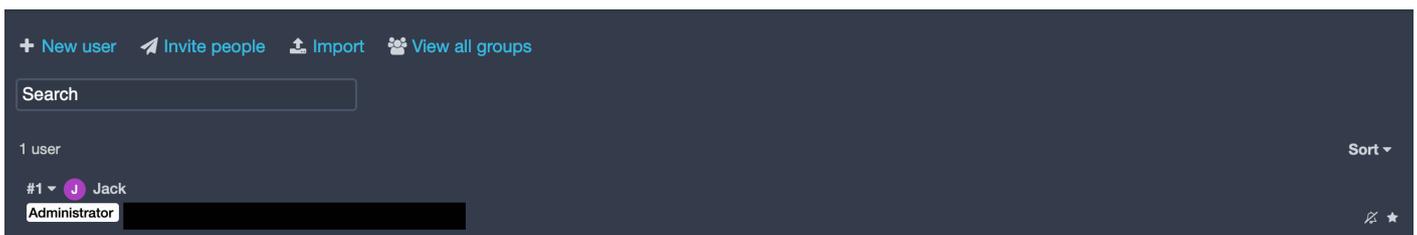

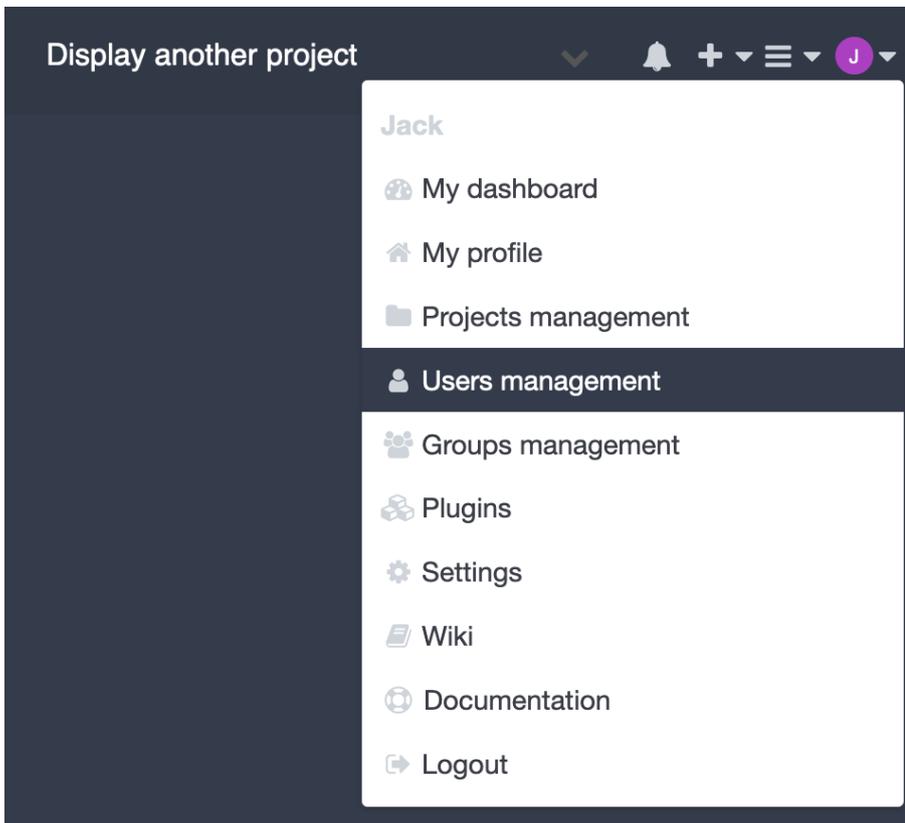

Managing Groups

In Kanboard, each user can be a member of one or many groups. A group is like a team or an organization.

Only administrators can create new groups and assign users.

Groups can be managed from **User management > View All Groups**. From there, you can create groups and assign users.
