

Deck

Deck is a kanban style organization tool aimed at personal planning and project organization for teams integrated with Nextcloud.

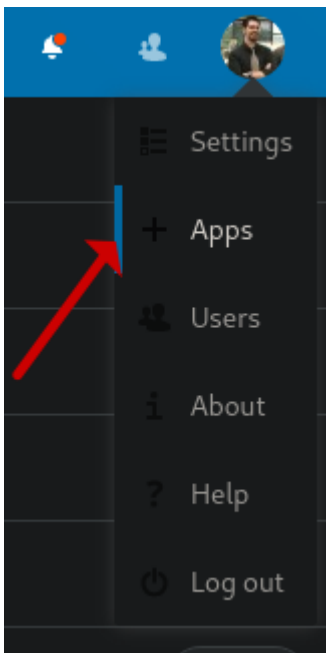

- Add your tasks to cards and put them in order
- Write down additional notes in markdown
- Assign labels for even better organization
- Share with your team, friends or family
- Attach files and embed them in your markdown description
- Discuss with your team using comments
- ✂ Keep track of changes in the activity stream
- Get your project organized

User Documentation: https://deck.readthedocs.io/en/latest/User_documentation_en/

Code Repo: <https://github.com/nextcloud/deck>

Install

As an admin, go to your Apps:

Search for Deck, and Download and Enable it

You'll see the Deck Icon show up on your apps:

Setup

You can add a new board on the left, and new columns using the "Add new list" button

Everything there can be rearranged as necessary.

Configuration

Deck has a subset of features that Kanboard has. Deck has the following features (in no particular order):

- Titles
- Assignees
- Attachments
- Due Dates
- Tags
- Description
- Comments

It is notably lacks the following when compared to Kanboard:

- Automated Actions
- Internal/External links

- Subtasks

However, for the most basic of workflows, it would be more than sufficient!
