

User Authentication

Authenticating Users

PropertyFileLoginModule

The default Rundeck installation handles user authentication via JAAS using the realm.properties file. This file is created at the time that you install the server.

Location:

- Executable War: `$RDECK_BASE/server/config/realm.properties`

```
#
# This file defines users passwords and roles for a HashUserRealm
#
# The format is
# <username>: <password>[,<rolename> ...]
#
# Passwords may be clear text, obfuscated or checksummed.
#
# This sets the default user accounts for the Rundeck apps
#
admin: admin,user,admin
user: user,user
```
